MEET GP ZUMA

This is GP Zuma the charismatic 9yo warmblood gelding by Glocks Zonik (dec) who is currently competing at Advanced Level dressage with success.

And his owner, Pauline from WA, is absolutely thrilled he's able to achieve this. Pauline is thrilled because he's had not one, but two airway surgeries over the past three years, each with only marginal improvement.

Pauline reports that after the surgeries, a product prescribed to assist his breathing was successful, however, it was not an option she could continue with for competition - it was swabable!

Searching for alternative options she says, "I have been using the **PulmonAID Paste**, as recommended, leading up to and during competitions for the past six months and have found it to be a safe, non-swabable alternative with great results.

Zuma showed improvement in his breathing capacity due to the reduction of airway and lung inflammation, as well as a feeling of more relaxation thanks to the overall effects of the **PulmonAID Paste**."

"I have been using the **PulmonAID Paste**, as recommended, leading up to and during competitions for the past six months and have found it to be a safe, non-swabable alternative with great results."

WHAT IS PULMONAID PASTE?

PulmonAID Paste is a unique supplement that contains a concentrated boost of vitamins, minerals and plant extracts to provide short-term and convenient pulmonary and respiratory support.

HOW DOES PULMONAID PASTE WORK?

PulmonAID Paste contains a unique formulation that assists in the efficiency of oxygen and nutrient delivery throughout the body and supports the pulmonary inflammatory response to help with stamina and endurance while at the same time supporting normal respiratory function.

FEATURES AND BENEFITS

- Supports normal pulmonary and respiratory function
- Concentrated nutritional boost for all performance horses
- Maximises stamina and endurance
- Short-term support for the pulmonary inflammatory response
- Easy to use
- Ideal for travelling and competition
