

# A horse that feels well, performs well.

## PERFORMANCE

- a. **KelatoVIT Performance:** A premium vitamin and mineral supplement high in antioxidants to support the immune system and chelated minerals for maximum absorption. Highly palatable powder or pellet.
- b. **PulmonAID:** Is a palatable feed supplement recommended for all performance horses to support the normal integrity and function of the lungs.
- c. **PulmonAID Paste:** Is a unique supplement that contains a concentrated boost of vitamins, minerals and plant extracts to provide short-term and convenient pulmonary and respiratory support.
- d. **NutriFLEX:** A broad spectrum joint supplement containing glucosamine to help regenerate joint cartilage, boron to prevent calcium leakage from bones, and amino acids to promote the strength and elasticity of ligaments and tendons. A long-term solution. Should be used daily to minimise wear and tear in joints.
- e. **Voltage Paste:** Amino acid paste designed to help energy production. More responsive and alert without the fizz.

- f. **ZanoBOLIC Concentrate:** Is a lysine and refined rice bran embryo extract (gamma oryzanol) supplement that aids in the development of lean muscle, topline and improves coat condition.
- g. **MuscleBUILDA:** A double-action muscle building supplement with gamma oryzanol and BCAAs.

## COMPLETE GUT HEALTH

- a. **GastroAID Recovery:** Is Kelato's ultimate supplement, targeting both foregut and hindgut health, supporting recovery from gastric ulcers and other common digestive conditions. GastroAID Recovery is unique as it provides the 'coating agents' pectin and lecithin, which form a barrier over the stomach wall to protect it from acid burn and strengthen the mucosal lining.
- b. **GastroAID Everyday:** Maintains the health and function of the total digestive tract for a healthier, happier horse. Pelleted, palatable and particularly beneficial for hindgut health due to the unique, powerful prebiotic and two live yeast probiotics.

## OPTIMUM HEALTH

- a. **HoofPRIME:** Strengthens, protects and nourishes the hoof wall. Antibacterial and antifungal properties reduce the risk of infection. Great for use on cracked, dry, brittle hooves. Suitable for use in all weather conditions. Can be used to provide protection after minor hoof damage and shoeing.
- b. **BiotinMAX CONCENTRATE:** Is an ultra-concentrated biotin supplement to support horses with poor hoof quality.
- c. **AminoGLOSS:** Non-irritating, low sudsing, concentrated, cherry-scented shampoo and coat conditioner. pH balanced to match the horse's skin with lanolin, almond oil and coconut oil.

## RECOVERY

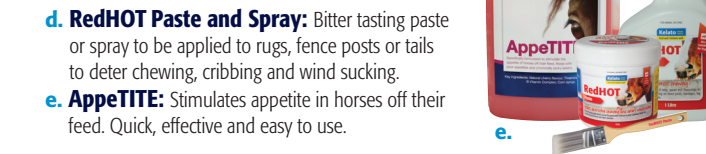

- a. **SwellDOWN:** A stable first aid essential! SwellDOWN is a clay poultice to quickly take heat out of inflammation, reducing swelling and overall leg soreness. Also has a cooling effect & easy to wash off.
- b. **LoosenUP:** Is a high-quality antioxidant supplement containing a blend of vitamin E, vitamin C, selenium, magnesium and chromium to support horses during times of illness, stress, recovery from injury and strenuous exercise.
- c. **KelatoLYTE:** Scientifically formulated electrolyte replacer designed to mimic the composition of horse sweat and actually replaces what is lost. Can be used as a daily supplement or as an electrolyte paste.
- d. **MuscleGUARD:** Provides amino acids, vitamins and potent antioxidants that have a role in maintaining normal muscle and nerve function during and after intense exercise. Supplementation with MuscleGUARD before and after the event can help provide relief from acute muscle soreness and fatigue associated with strenuous exercise.

## BEHAVIOUR

- a. **BetaCALM:** Calming supplement for nervy horses. A unique combination of thiamine, magnesium, tryptophan and vitamin E to help calm and relax.
- b. **BetaCALM Paste:** 3 x 10mL per syringe. Effective calming paste specially designed for nervous, stressed or 'hot' horses.
- c. **BetaMARE:** An all natural chasteberry supplement for moody mares.

- d. **RedHOT Paste and Spray:** Bitter tasting paste or spray to be applied to rugs, fence posts or tails to deter chewing, cribbing and wind sucking.
- e. **AppeTITE:** Stimulates appetite in horses off their feed. Quick, effective and easy to use.

## FIRST AID

- a. **QuikHEAL:** Aids in the elimination or prevention of greasy heel and dermatitis. Antifungal and antibacterial. Very beneficial for general cuts and abrasions.
- b. **KelatoWRAP:** Latex free adhesive bandage, high strength, pure cotton fibre bandage with excellent adhesive properties – 40% longer than other brands.
- c. **EnduroWRAP:** Cohesive bandage (sticks to itself, not the skin) designed for temporary bandaging to support tendons and ligaments, injuries or travelling. Resistant to water and sweat and can be torn by hand so no scissors needed.
- d. **Cotton Wool & Gauze:** Highly absorbent cotton wool in a gauze cover. For wound dressings or structural support. Individually wrapped to maintain cleanliness and hygiene. Available in 250gm or 500gm.
- e. **Cotton Wool:** White, bright and soft highly absorbent cotton wool with minimal fibre shedding. Individually wrapped to maintain cleanliness and hygiene.
