

YOU DO PET-LIFE WE DO THE WORMING

**Drontal® is the gold standard
for gastrointestinal worming.**

So when it comes to protecting
against the “dirty dozen”
gastrointestinal worms, use
Drontal® to fill the gaps and
provide complete protection.

BROAD SPECTRUM

ONLY DRONTAL DEALS WITH THE DIRTY DOZEN

When it comes to gastrointestinal worms, the spectrum covered by different products varies greatly.

Whether it's compared against other allwormers or against combination products, only Drontal® protects against the 'dirty dozen' species of worms. The three active ingredients in its formula have been scientifically proven to treat and control more gastrointestinal worms than other brands¹, and *Giardia* spp. in dogs.

[#]Including immature *T. canis*. [^]Aids in control of *U. stenocephala* only. ^{*}*T. pisiformis* only. [‡]if given monthly
Drontal® does not control heartworm. **Note: Milpro® has the same active ingredients and claims as Milbemax™**

HIGHEST EFFICACY

NOT ALL WORMING PRODUCTS HAVE THE SAME EFFICACY

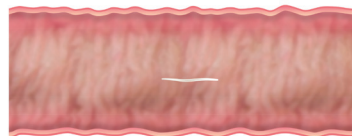

Unlike other wormers, the active ingredients, Febantel and Pyrantel, in Drontal® work synergistically to treat and control roundworms and hookworms.

Comparative efficacy of a single dose of intestinal worming products against *A. caninum* in dogs^{2,3} shows:

Drontal® has been proven to be highly effective after a single dose.

Febantel and Pyrantel
Drontal®

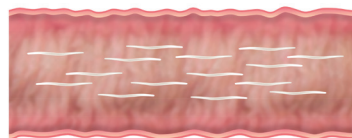

99%
EFFICACY

1 worm left
after treatment
Approx. 0.1 mL of
blood loss per day.

Milbemycin oxime
Interceptor™, Sentinel™ and Milbemax™

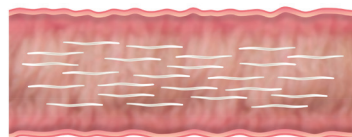

85%

15 worms left
after treatment
Approx. 1.5 mL of
blood loss per day.

Pyrantel and oxantel
Popantel®

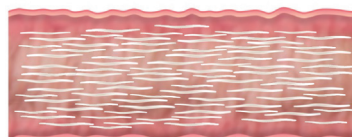

76%

24 worms left
after treatment
Approx. 2.5 mL of
blood loss per day.

Oxibendazole
Endogard® and ParaGard®

8%

92 worms left
after treatment
Approx. 9 mL of
blood loss per day.

Effective worming treatment
starts with Drontal®

HOW TO USE DRONTAL

TO FILL THE GAPS EVERY 3 MONTHS

DRONTAL® + COMBINATION PRODUCTS

Dosage

Drontal®: every 3 months

All in one: check details on product

Coverage

Considerations

- Give products with a 48 hour difference, especially when combining with another product containing Pyrantel.
- Drontal® has been tested with pregnant or breeding animals, consult if this is the case for other products.

DRONTAL® + FLEA & TICK PRODUCTS

Dosage

Drontal®: every 3 months

Flea & Tick: check details on product

Coverage

Considerations

- Give products with a 48 hour difference.
- Requires a heartworm product for full protection.
- Drontal® has been tested with pregnant or breeding animals, consult if this is the case for other products.

DRONTAL® + HEARTWORM INJECTION + FLEA & TICK INJECTION

Dosage

Drontal®: every 3 months

Injection: Yearly

Coverage

Considerations

- Give products with a 48 hour difference.
- Drontal® has been tested with pregnant or breeding animals, consult if this is the case for other products.

Roundworm

Hookworm

Whipworm

Tapeworm

Giardia

Heartworm

Fleas

Ticks

Drontal® is safe to use with pregnant and lactating dogs. Consult with a veterinarian before combining with another product in pregnant bitches. Treating Giardia requires three consecutive doses of Drontal®.

USE DRONTAL® TO FILL T

Drontal® is available in a variety of formats to make filling the gaps** as easy as possible.

ORAL SUSPENSION

- Specifically for puppies
- Designed for easy dosing and to establish a worming regime from the early stages

Drontal® has a solution for dogs (and businesses) of all shapes and sizes.

RETAIL PACKS

RETAILER PACKS	WEIGHT		DOSE	PACK SIZES	PIECE SIZE
Chew	Large Dog	>35kg	1 chew / 35kg	2 pack	1.5cm x 3.5cm chew
	Medium Dog	10-35kg	1 chew / 10kg	2 pack	1cm x 2cm chew
	Medium Dog	10-35kg	1 chew / 10kg	5 pack	1cm x 2cm chew
