## FreeCat

FreeCat was founded by passionate cat lovers dedicated to supporting feline health and happiness through top-quality, natural products. The inspiration for FreeCat came from our own cat, Latte, who struggled with anxiety that affected his overall well-being. To support his mental health, we introduced various forms of enrichment at home. 6 years later, Latte is thriving, and we realised that his improved health could benefit other cats as well. That's how FreeCat was born—offering products that promote both feline health and natural behaviours.

# FreeCat Premium Clumping Cat Litter ODOUR CONTROL

## ODOUR-FREE HOME

Freecat litter's odour control is enhanced by natural sodium-based ore, activated carbon, and zeolite. The natural sodium-based ore acts as a deodoriser, while activated carbon traps odours. Zeolite absorbs moisture, minimizing odour-causing bacteria. Together, they create an effective system, ensuring a fresher environment for both cats and owners.

## 99.9% DUST FREE

We believe that a cat's well-being is of utmost importance, and that's why we've crafted Freecat cat litter. This cat litter is designed not only to keep your home clean and fresh but also keeps your cat's respiratory health in mind. Experience cleanliness with our dust-free cat litter—because your cat deserves the best, and so do you.
