

HOW TO USE AN OZ-PET LITTER TRAY

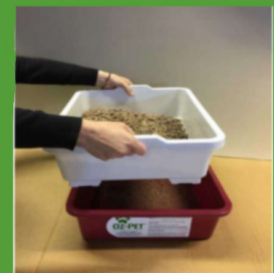

"A Sales Initiative"

It is important for your staff to know the steps involved in using our 2-Piece Sieve Litter Tray system. These are set out here in these images opposite . It is an easy process to learn and helpful for your store staff to understand this process, and what the benefits for customers are once they adopt this system.

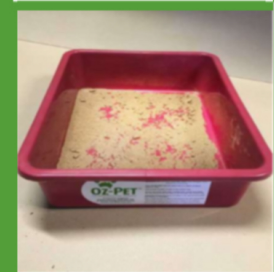

Once the consumer tries it, and figures out that they are only throwing away the soiled litter, they realise they are saving money. They are only topping up the wood pellets rather than throwing away a full tray of litter at each change. This is extremely relevant today for your customers with the current Cost of Living Pressures.

SCOOP OUT THE SOLIDS
After scooping out the solids
The tray is ready to use

SHAKE THE TRAY
Shake the tray to separate the wet fines (soiled pellets) from the good litter. If there are a lot of fines give the tray a stir with the scoop, this will help to separate them.

THE WET FINES ARE SEPARATED
The wet fines fall through
Into the bottom tray

HOW TO USE AN OZ-PET LITTER TRAY

“A Sales Initiative”

The Oz-Pet Cat Loo Kit has two trays included. It means you rotate a tray each time you clean your cats litter. You always have a fresh tray under your litter while you clean the used tray, to be ready for the next change.

Environmentally Friendly - Waste Litter (sawdust) is disposed of on the lawn, in the compost bin, or in the garden (not Veg Garden).

DISPOSE OF THE FINES

The wet fines are now good
For the flower garden,
compost bin & lawn.

BOTTOM TRAY

Add a small amount of litter
To the bottom tray

TOP TRAY

Add a small amount of litter
To the top tray if needed
