Functional Supplements
for Dogs & Cats

lovebites B-Calm

Naturally boosts serotonin levels, with a non-sedative, non-drowsy action.

A simple change in routine can lead to stress or anxiety.

Mini in size!

STRESS AND ANXIETY RELIEF

- L-tryptophan and thiamine assist in the management of stress & anxiety
- Contains natural Australian ovine plasma and tasty mackerel
- Formulated by veterinarians and animal nutritionists

Joint Support

FlexJoint contains a synergistic combination of New Zealand Green Lipped Mussel and glucosamine, which may assist in the relief of debilitating arthritic symptoms. FlexJoint is excellent for dogs suffering from arthritis, working dogs, older dogs and those predisposed to joint problems.

Support

May assist animals suffering from osteoarthritis, joint pain and reduced mobility.

Repair

Glucosamine provides the nutritional components for joint function and repair.

Function

Green lipped mussel may assist in the reduction of inflammation and joint function.

Stress Relief

B-Calm is formulated by veterinarians to nutritionally support the management of stress and anxiety with natural ingredients. Made with the amino acid L-Tryptophan a natural precursor for the synthesis of serotonin in the brain. Flavoured with Australian ovine plasma and kangaroo. No artificial binders, colours or flavours. Grain free.

Daily Formula

Perfect for daily support during stressful times such as travel, relocation and separation.

Night Stress

Useful for geriatric animals that suffer from night time stress and barking episodes.

Non-Drowsy

Non-drowsy, non-sedative action making it great for long term use.

Dental Health

DentaShield chews are a functional treat designed to help combat dental disease using a unique combination of Norwegian Brown Kelp and SHMP. Norwegian Brown Kelp is rich in natural compounds that may interfere with plaque accumulation and SHMP may aid in the prevention of tartar formation.

Daily Formula

Veterinarian formulated for daily use as a treat to assist ongoing oral health.

Biofilm Control

Polyphenols found in Norwegian brown kelp are clinically proven to assist in the reduction of plaque and gingivitis.

Tartar Reduction

SHMP aids in tartar control and is clinically proven to reduce dental calculus.

Daily Wellbeing

Predamax contains an invigorating combination of essential vitamins, minerals and a dual source of calcium to enhance and balance your dog's diet. Predamax is essential for dogs fed a raw/homemade diet, lactating and pregnant bitches, growing puppies and any dog that needs a nutritional boost.

Daily Formula

Supplies 25% of the NRC canine requirement for daily vitamins and minerals, assisting with nutritional balance and optimal health.

Vet Formulated

Designed by veterinarians to ensure optimum nutrition for dogs fed on diets that may lack essential nutrients, such as wet and raw foods.

Multi-Species

Predamax meal toppers are suitable for all cats and dogs.
