

OZ-PET CRUMBLES CAT & PET LITTER

A Litter That Is Ideal For Kittens

Oz-Pet "Crumbles" Litter 7kg is a different type of hardwood litter, unique to Oz-Pet. Essentially this product is made by a second step in our production process. We place the finished original wood pellets into a "Crumbler". This is a piece of equipment that breaks down the hardwood pellet into smaller-sized wood granules.

Besides having all the attributes of our OZ-PET ORIGINAL HARDWOOD LITTER this litter is very lightweight. Kittens and Cats that like to dig enjoy this style of litter due to its soft feel. Additionally, due to this soft texture it is an ideal bedding for many types of animals, rodents and reptiles.

OZ-PET CRUMBLES CAT & PET LITTER

A Litter That Is Ideal For Kittens

Very early on in the introduction of Crumbles Litter we found it is ideal to start Kittens out on this litter as it is much easier on their feet. Breeder feedback that followed was very positive, and our Breeder network continues to promote it as an introductory litter, before moving their cats onto our traditional wood pellet litter.

Crumbles Litter is featured extensively at many of the Cat Shows & Pet Expos we sponsor. Like our wood pellets, Crumbles waste litter is also Environmentally Friendly and can be disposed of on the lawn, in the compost bin, or in the garden (not Veg garden).
