

SYNBIOTIC

180-S

Suitable for all animals.

Soft Stools or Diarrhoea?

Firms stools by restoring good gut bacteria — great for diet changes, stress, or mild upsets.

Itchy Skin & Paws?

Boosts your animal's immune system and reduce skin flare-ups.

Pet On Antibiotics?

Enzymes offer digestive support throughout antibiotic therapy, while probiotics replenish good gut bacteria post-treatment.

Sensitive Stomach, Gassy, Pancreatitis?

Aids digestion, reduces bloating, gas, and food sensitivities.

Changing Food?

Eases food transitions by stabilising gut flora and preventing upset tummies.

TRIPLE ACTION FORMULA

Synbiotic 180-S is Australia's only 9-strain probiotic blend, providing comprehensive gut support. The name "Synbiotic" reflects its unique combination of prebiotics and probiotics. Prebiotics feed the probiotics and enhance their growth and activity. Each strain of probiotic plays a specific role in your pet's digestive system, offering broader coverage, greater resilience to illness and dietary changes, and helping maintain a balanced microbiome.

Unlike standard probiotic blends, Synbiotic 180-S also contains enzymes. These help break down food into easier-to-absorb components. They are also unaffected by antibiotics, meaning they can continue to support gut function during treatment - keeping digestion on track and aiding in the restoration of beneficial bacteria.
